

FOR IMMEDIATE RELEASE

American Engineering Corporation Recognized as an Outstanding Construction Company

September 24, 2024

American Engineering Corporation (AEC), headquartered in Ginowan City, Okinawa (President and CEO: Kenneth Mark Exsterstein) was honored as an Outstanding Construction Company by the Okinawa Prefecture Chūbu Agricultural Civil Engineering Office on September 19, 2024.

During the award ceremony, AEC President & CEO Kenneth Mark Exsterstein and Site Superintendent Hirokazu Miiji represented the company and received the award certificate from the office's Director, Kagemasa Takahara.

Awarded Project Details

- **Project Name:** Land Improvement Project for the Senaha District (R5-1)
- **Contract Value:** 191.378 million yen
- **Construction Period:** May 2, 2023, to March 28, 2024
- **Selection Criteria:** The project faced difficulties due to the need to import rocks after the on-site materials proved unsuitable for stacking. Despite this challenge, AEC completed the project within the designated timeframe by devising innovative construction methods. Additionally, proactive measures for weed control were implemented, garnering appreciation from the local community. These efforts were highly evaluated, leading to AEC's selection for this honor.

Certificate

Upon receiving the award, Kenneth Mark Exsterstein expressed his gratitude, stating, “This recognition is a testament to the efforts of our entire team, especially the dedication of Site Superintendent Hirokazu Miiji. We are honored by this achievement and remain committed to contributing to Okinawa’s development not only through military-related projects but also in government and prefectural works.”

Hirokazu Miiji, the Site Superintendent, added, “Despite the tight construction schedule, we successfully completed the project thanks to the innovation on-site and support from head office. I am thrilled that our team's hard work has been recognized with such high praise.”

Encouraged by this award, AEC will continue to contribute to the community by providing safe, high-quality construction services with a strong commitment to safety.
